#### **PROJECTS**

## REACT DEVELOPER | CONWAY'S GAME OF LIFE | APRIL 2020

- Description: Conway's Game of Life is a React web application that simulates the implementation of the cellular automaton, devised from the mathematician John Conway.
- Github: https://github.com/LoganNegley/Game-of-Life-Conways
- Languages & Skills Utilized: HTML, CSS, Javascript, React
- Project Role: Utilized React library to develop front-end of application and Material UI framework to develop application user interface.

## REACT DEVELOPER | HOGWARTS INVISIBILITY CLOAK | FEBRUARY 2020

- Description: Hogwarts Invisibility Cloak is a React web application platform for Harry Potter fans to look-up information on franchise characters.
- Github: https://github.com/LoganNegley/Harry-Potter-React
- Languages & Skills Utilized: HTML, CSS, React, Javascript, Harry Potter API
- Project Role: Utilized the Harry Potter API to acquire data for front-end application development. Implemented Figma design tool to create UI design and wireframe of application.

## REACT DEVELOPER | EXPRESS GROOMERS | OCTOBER 2020

- Description: Express Groomers is a React web application which connects pet owners to a directory of local pet groomers.
- Github: https://github.com/Lambda-School-Labs/LabsPT12-Express\_Groomer-TeamE-FE
- Languages & Skills Utilized: HTML, CSS, React, NodeJs, Postgres, Knex, Javascript
- Project Role: Collaborated with a team of 4 developers to build web application. Independently built profile and form components utilizing React.js by using Axios REST API to make HTTP request database server.
